## Features

Designed to be used with electric, gas or oil heating control systems. Put the double-way receiver near to boiler and place the wireless thermostat in the living room or bedroom, the user can remote control the room temperature via mobilephone APP.

Cürv Wireless Thermostat	
Power source:	4 AAA batteries (WiFi unavailable) USB power supply(5V 1000mA) AC 100-240V 50/60Hz
IP Rating:	IP21
Temperature setting range:	5°C~35°C
Temperature setting accuracy:	0.5°C
Temperature display range:	5°C~50°C
Temperature accuracy:	0.1°C
Operation temperature range:	0~50°C
Shipping & storage temperature:	-10°C~60°C
Frequency:	868MHZ(Bidirectional FSK)
Wireless transmit range:	50M
WiFi Communication protocol:	TCP/IP, MQTT
WiFi frequency:	2.412GHZ-2.484GHZ

Cürv Receiver	
Power source:	100-240VAC 50/60HZ
IP Rating:	IP21
Operation temperature range:	0~50°C
Shipping & storage temperature:	-10°C~60°C
Output:	Relay Load 250v/16A ,standard 16A, Along ON/OFF Passive linkage(0.5A)
Frequency:	868MHZ(Bidirectional FSK)
Wireless transmit range	50M
